

## EDITORIAL

### Journal of Research on History of Medicine Turned 10 Years Old

The Journal of Research on History of Medicine started to be published since February 2012; and turned 10 years old by publishing the 10th volume in November 2022. The journal is published successfully and continuously during these 10 years. There are 284 published articles that are written by 342 authors from 18 countries (Rajabpour Shirazi, et al., 2021). We celebrate this achievement in November 2021 (Figure 1).

This success is due to a teamwork of editorial team during these years. I gratefully thank all the team, editorial team, international advisory board and journal's office. Now, we will go to the second decade of the journal by starting to publish Volume 11 at 2022. We aim to improve the quality of the journal in this second step of the journal's life. The journal should be more visible by indexing in more high quality abstracting and indexing databases. We will try improving the quality of the papers by find more expert contributors as authors
